a clever new idea...

The **Flexiled**, which recently featured on the BBC's **Dragons Den**, is a **clever new idea** designed to **change** the way you install downlights.

the future shape of lighting

Flexiled i-drive lamp holder:

Waterproof and **lightweight**, with **excellent fire retardant properties**, making it ideal for **bathrooms** and **kitchens**.

A replacement for costly spot lamp and down lights, **tomorrow's thinking, materials** and **technology**.

Available in **any colour** subject to quantity and with a **brushed steel bezel** plate.

The solution removes the need for tension springs or circlips to hold the lamp in the cavity, thus ensuring the product is **easy to install** and can be removed **without risk** of causing damage.

The Flexiled is designed to be lightweight, with excellent technical properties making it ideal for domestic & semi-commercial applications.

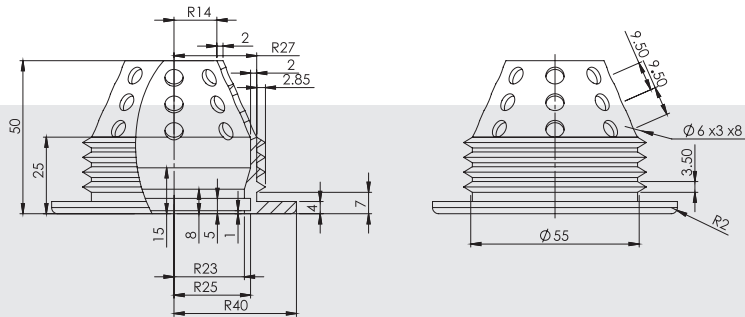

The Flexiled can be used as a downlight holder for your standard GU10 fitting or as a complete fitting with Magiled's newly designed 5W LED module.

- A unique, LED drive holder designed for led luminaire's for tomorrow's LED technology
- New innovative configuration for future led lighting engines
- Futuristic aesthetically pleasing design
